

### Tech Tip #27: eDOCSignature Auth Codes

Did you know that you can further secure access to an electronic document waiting for signature by utilizing Authorization Codes (Auth Codes)? Auth Codes are text strings that your member must enter before they can view or complete a document using eDOCSignature. The string can be alphanumeric. Auth Codes can be automatically delivered to your member via email or provided verbally by the credit union.

Signer Name	Email Address	Msg Type	Auth Code	ID	Group	Resend	Sign
Johnny Doe	John.Doe@gmail.c	Public ▾	trs80	<input type="checkbox"/>	1 ▾	 	

Auth Codes are optional. If your institution would like to enable or disable these for your signer emails, please contact our [Client Development Team](#) to request this change.
