Tech Tip #39: Did you know that eDOC has streamlined integrations with multiple providers?

eDOC Innovations has been in the credit union space since the early 90's. Throughout the years, eDOC has built many integrations with multiple platforms and partners. These integrations include:

- CORE Providers
- LOS Providers
- Payment Systems
- Imaging Systems
- Check Processing
- and much more!

We pride ourselves on our perpetual willingness to respond to our credit union peers and owners. In fact, many of these key integrations were driven directly by credit unions themselves. We are actively engaged in adding more providers and are always open to new opportunities as they come along. As you evaluate your core, imaging, e-signature, and check processing needs, ask yourselves this: **"Does eDOC already have this integration?"** Chances are eDOC can help with your credit union needs!

- Time – Low effort required to continue to benefit from your existing eDOC solutions
- Money – No need to purchase new storage solutions or switch e-sign providers
- Staff Headaches – By using systems familiar to them, staff can be streamlined into new integrations

Be sure to reach out to our Sales Team with any and all of your imaging projects and e-sign needs. We are here to help!
