# Tech Tip #42: ProDOC *Packages* Option is Missing

These settings and features may not be available for all clients. If you do not see them, please contact your solution provider.

If you do not see the Packages option on the ProDOC menu, please contact your system Administrator before adding it by following the steps below.

Right-clicking on the ProDOC icon opens the Options menu (shown below). Some of the settings listed in the Options menu, including *Packages*, can be enabled or disabled in the ProDOC.ini settings file.

Enabling *Packages* is very easy and can be done by following these steps:

1. Open the following path using windows file explorer:

   C:\RDI_Work\Priv_PDoc

2. Open the ProDoc.ini file

3. Search for "Packages"

4. Update the line to read "Packages=1"

Close and relaunch ProDOC. This will update the ProDOC menu to include the *Packages* option.
